RE: PR Docket 92-235

Dear Mr. Haller:

At the February meeting of the Wayne County Fire Advisory Board a discussion was held in regards to the proposed changes in the 70MHZ-512MHZ radio frequencies as discussed in PR docket 92-235.

After much discussion, it was the general opinion of those present that we express our **OPPOSITION** to this proposed change.

Since the majority of users of these frequencies are Public Service oriented ie: Fire, Police, EMS and Public Safety, it would be a overwhelming expense for local government agencies and volunteer based organizations should they have to change their existing radio systems to conform to these new regulations. Also, the systems would not work in our area due to terrain and the overall size of our County with the stipulations of power and airwave mileage transmission that have been mentioned.

Our suggestion to you would be to attack those radio systems who profit from the use of their radios in this range such as the portable telephones, taxi services, paging systems etc.

Please keep us abreast of the FCCs' decision.

Sincerely yours,

*Richard K. Murphy*
